Aspiring Junior Software Developer (Frontend) | JavaScript & React | Python & Django | HTML & CSS | Git/GitHub

PROFESSIONAL SUMMARY

Motivated and detail-oriented Junior Software Developer with a strong foundation in frontend development, including React.js, JavaScript, HTML, and CSS, alongside Python and Django development. Passionate about building responsive, accessible, and user-centered web applications using clean, maintainable, and scalable code. Experienced in component-based development, Git version control, and hands-on software projects. A quick learner with strong problem-solving and collaboration skills, eager to contribute to innovative projects while continuing to grow as a software engineer.

KEY ACHIEVEMENTS

- Completing a Software Engineering programme at Uncommon.org (January 2026 – December 2026), building practical skills in software development and web technologies.
- Built a responsive To-Do task management web application using Python and Django, with a live deployed version available online.
- Volunteered as a Scratch Programming instructor, assisting primary school students with coding fundamentals and computational thinking.
- Earned Coursera certificates in JavaScript, Python, and React.
- Developed a strong technical foundation across JavaScript, React, Python, HTML, CSS, Git, and GitHub.

CORE COMPETENCIES

JavaScript • React.js • Python • Django • HTML • CSS • Git & GitHub • Frontend Development • Responsive Web Development • Problem-Solving • Communication • Teamwork • Time Management • Adaptability

PROFESSIONAL EXPERIENCE

Scratch Programming Volunteer | *Uncommon.org*

- Assisted primary school students in learning coding fundamentals using Scratch.
- Supported learners as they developed foundational programming and problem-solving skills through practical activities.

Python & Django Web Application Developer | *To-Do Application*

- Live application: [View To-Do App](#)
- Built a responsive task management application using Python and Django.
- Developed and deployed the application as a live web app.

CERTIFICATIONS

- JavaScript | Coursera
- Python | Coursera
- React | Coursera

EDUCATION

Software Engineering | *Uncommon.org* | *January 2026 – December 2026* | *Harare, Zimbabwe*
Programme in progress.

BSc in Business Management and Entrepreneurship | *August 2019 – August 2023* | *Chinhoyi, Zimbabwe*

DIGITAL TOOLS & TECHNICAL SKILLS

JavaScript • React.js • Python • Django • HTML • CSS • Git • GitHub • Frontend Development

PROFESSIONAL ATTRIBUTES

Strong communication skills • Effective time management • Collaborative team player • Adaptable and quick to learn • Strong problem-solving mindset • Reliable and detail-oriented
